

FIRST SIX YEARS DETERMINE A LIFETIME...

From birth up to six years in a child's life are the most important for early brain development. Humans are born with 100 billion neurons in their brains but the wiring connecting them is not in place. In the first six years of life, a child's brain rapidly lays down these synapses.

The brain's architecture is grown as children manipulate the world to see how it works, interact with loving parents, negotiate the social world with each other, and create playful and imagined worlds that live in their

DECODING A CHILD

The adult gaze is conditioned to see things in black or white but the world that children reside in, there are many shades and layers. Each child is unique and has individual likes, desires, drives and aptitudes.

Understanding, insight and perceptiveness of a high order are called for, that is way beyond the comprehension of the uninitiated.

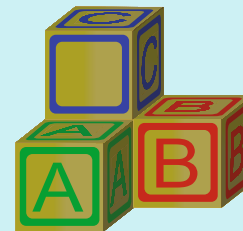

We at Pathways, celebrate this uniqueness and are pilots in navigating this journey.

PATHWAYS... & THE EARLY YEARS

These early experiences that children have – the things they see, hear, touch, smell and taste – stimulate the brain, emerging as the drivers for growth.

As an institution committed to fostering and nurturing a child's journey through his/her early years, Pathways is uniquely equipped to play a sensitive, child-friendly guide and

Our Programs

Infants

1 year - 1 year 6 months
